The "Smart" Warehouse
Management System

from

Dexterity WMS from Barcode-IT is a cost effective and easy to use stock control and warehouse management system, designed to maximise the supply chain efficiency of warehouse or stock control operations in manufacturing and distribution businesses. Dexterity offers a "live" interface with all transactions done in real-time using Cisco industrial WiFi.

Dexterity WMS maximises the efficiency of your supply chain by automating key stock control processes, from goods receiving through inventory location and storage, to fulfilling picking and shipping orders for customers. Dexterity WMS integrates with: SAP, Oracle, Microsoft Dynamics, Navision, Sage 200, Sage 500, or your current legacy system.

Dexterity WMS Systems are designed to be parameter driven, meaning that the warehouse management system is configured to suit your warehouse operation for a near 100% operational fit without compromise. This reduces the need for complex and costly bespoke software and makes for a rapid implementation timescale meaning you can quickly start to realise the benefits to your business. At Barcode-IT we provide a comprehensive up front project scoping exercise, professional project management, implementation control and service to ensure on time and on budget installation. Rapid installation and deployment takes typically 12 weeks from project start to "go live".

Dexterity WMS features at a glance:

- ✓ Automates order picking using mobile terminals

Why move to a barcode driven warehouse?

There are numerous benefits to using barcodes within your warehouse; both in terms of efficiency and profitability. Dexterity WMS uses barcodes to automate the tracking of goods through the warehouse and relay data back to the host system, to provide a real-time view of the warehouse operation.

- ✓ Meet customer targets and expectations
- ✓ Reduce complaints from incorrect shipping
- ✓ Achieve 99.9% stock accuracy
- ✓ Ship more orders through improved efficiency
- ✓ Eliminate annual physical stocktaking
- ✓ Reduce labour costs by automating warehouse tasks and processes

Don't just take our word for it...

"We run a 24 hour warehouse operation and with Dexterity WMS we can pick at a much faster rate than before. It's as if we have extra staff! The cost savings involved and the increased speed and accuracy means that Return On Investment has been fantastic." - Nick Weir, Operations Manager at Comline UK.

Dexterity WMS - Carrier Integration

Dexterity WMS can be integrated with numerous well known carrier's software to provide further automation to the despatch process. Full integration eliminates the need to "key in" customer names and addresses to produce tracking labels, saving time and producing flawless tracking and delivery labels every time. As orders are picked and packed, the operator can enter the number of packages and the carrier and service to be used for despatch. Dexterity WMS then passes the relevant information to the carrier software, which then prints the tracking labels. Benefits include:

- Seamless integration with carrier shipping software
- Automatically creates and prints shipping labels
- Scan to record carrier tracking details
- Complete traceability from picking to delivery

Dexterity integrates with many major Carrier's software including:

Dexterity WMS Project News

Dexterity Users Upgrade to Dexterity WMS Version 3

Existing Dexterity WMS users are updating their installations to the latest version of the software. Dexterity WMS version 3 enhances Dexterity's order pick, pack and despatch functionality and takes warehouse management for SMEs to the next level with advanced functions usually only found in best of breed WMS systems.

Customers choosing to upgrade their Dexterity installation include Endon Lighting, Supreme Imports, Comline Auto Parts and Vufold, part of the JCI Group. All are keen to take advantage of the new features, which can now be found within the software that will bring further benefits to their businesses, including improved efficiency, improved carrier integration module and improved functionality. Full details of these customer projects can be found on our website.

Blue Suntree Benefit From The Installation of Dexterity WMS

Specialists in modern, contemporary and designer classic furniture, Blue Suntree installed Dexterity WMS from Barcode-IT in 2013 and haven't looked back since. The decision to install Dexterity WMS was as part of the move to a larger warehouse facility, where efficiency and speed in picking were deemed to be even more important. Blue Suntree are so happy with Dexterity WMS that they are now acting as a reference site to show prospective Dexterity WMS customers how the solution works in a real warehouse.

Installation of Dexterity WMS Commences at Ashleigh & Burwood

Specialist home fragrance producer, Ashleigh & Burwood have chosen Dexterity WMS for Sage 200 as their warehouse management solution for their Walton-on-Thames site. Following detailed evaluation of competitor solutions, Ashleigh & Burwood concluded that Dexterity WMS offered the most comprehensive package of features and Barcode-IT's experience in integrating with carriers DPD and TNT helped to sway the decision, with the order coming through in May 2014. A detailed testing and training phase followed before the final "go live" of the system.

Tangle® Teezer Choose Dexterity WMS For New Distribution Centre

Tangle® Teezer, the manufacturer of professional detangling hairbrushes that once featured on the BBC's Dragon's Den, have chosen Dexterity WMS for Sage 200 from Barcode-IT to implement into their new Distribution Centre based in Croydon. The company currently use an existing Sage 200 Warehouse Management Add-on to help manage their warehouse, but felt that it was not suitable for their expanding business and when searching the web found Dexterity WMS. After a series of in depth meetings with Barcode-IT consultants, Tangle Teezer chose Dexterity WMS, a decision that they came to just 4 weeks from their original enquiry!
